

Martin Jenkins

Producer / Programmer / Engineer

Martin has been working with Miloco for over 10 years. Once again he is one of our engineers who started life as a Miloco assistant and learned all his recording tricks in our studios. Martin is a top Protools engineer but is equally at home with Logic, and keeps up to date on both pieces of software by writing his own material on his home setup.

Martin excels in all aspects of recording and production. He's worked extensively with producers like Teo Miller, Trevor Jackson and Matt Johnson, and his talents are in demand at many of the top studios in France as well as elsewhere in the UK. Not content with being a terrific engineer, Martin also writes and records his own music under the name of Stratus – giving him further insight into the needs of today's recording artists.

Martin's list of recent clients is nothing if not diverse. As well as artists such as David Sylvian, Mark Owen and singer/songwriter Cathy Dennis he's also found time to help out new act Velarsound. As a producer in the Optimus outfit, he has remixed the likes of Kylie, 80's Belgian industrialists Minimal Compact, Ultimate Dilemma act Magnet, and has also remixed Serge Gainsbourg, Lambchop, and Calexico as Stratus. He's currently working on remixes for former Morcheeba singer Skye Edwards, and "nu house" act Colder, for the Output label.
