

# Matt Hyde

Producer / Engineer / Protocols Engineer / Musician

Matt's attention to detail is second to none. Add to this, his strong technological background and in-depth knowledge of both band backline, and studio equipment, you see why he's one of the most capable producer engineers in town, and the fastest protocols user we know!

He's been working with Miloco Studios for almost ten years and has built his reputation working with established and up and coming indie acts, as well as cutting edge heavy rock and metal bands. He's become a favourite engineer with producers such as Colin Richardson and has helped record and mix albums for the likes of Chimaira and Sikth. Matt has been able to make full use his musical background and understanding producing projects for French act Mass Hysteria, Fightstar, Ash, and Funeral For A Friend among others.

Last year he mixed the 25-year anniversary, and Slipknot live albums for US based label Roadrunner, as well tracks for indie bands Hard-Fi and The Kills. He also mixed and co-produced the debut album of The Bright Space, but spent much of last year, and time this year with pop-metal outfit Fightstar. Matt's also been busy recently working in the States with new metal band Hostility, Ireland with rock band Numinous, as well as work for Bullet For My Valentine, and Foy Vance. He has spent much of the summer working on the second Trivium album
